<b>Total</b>	<b>2,786</b>							
<b>Level 1 &amp; Level 2 Assets</b>	<b>116</b>							
<b>Balance sheet investment portfolio</b>	<b>2,902</b>							

1. Where the Group has co-invested with its managed funds, it is the type of the underlying investment, and the valuation techniques used for these underlying investments, that is set out here.

2. For investments valued using a DCF methodology (including Infrastructure investments) the imputed earnings multiple is used for this sensitivity analysis.

3. The sensitivity analysis is performed on the entire portfolio of subordinated notes of CLO vehicles that the Group has invested in with total value of £182.8m. This value includes investments in CLOs that are not consolidated (2023: £7.5m) and investments in CLOs which are consolidated (2023: £175.3m). This excludes the £9.6m investment in the Risk Retention Fund. The upside case is based on the default rate being lowered to 2.5% p.a. for the next 24 months, keeping all other parameters consistent. The downside case is based on the probability of default being increased over the next twenty four months to 6.5% p.a., keeping all other parameters consistent.

4. The effect of fair value across the entire investment portfolio ranges from -£321.8m (downside case) to +£319.5m (upside case).
